## OHV SAFETY GUIDELINES

Always ride in control. Ride within your abilities and your machine's capabilities. Never attempt anything that is beyond your skill level.

Always wear the appropriate safety gear. At a minimum, this should include a helmet, shatter resistant eye protection, long sleeves, long pants, gloves, and boots that cover the ankle.

Only carry passengers if your OHV is specifically designed to do so. ATVs and off-road motorcycles are designed to be ridden only by one rider. Carrying passengers can alter the balance of the machine, causing loss of control.

Riders under the age of 16 should be supervised by a responsible adult at all times.

Riders should be able to straddle the machine with a slight bend to the knees while both feet are on the footrests. Riding a machine that is too big is a major cause of injuries to young riders.

Always tell someone where you are going and when you will return. Provide them with a map of your intended riding area.

Be prepared for any emergency. Always carry a tool kit and spare parts, a first aid kit, and survival equipment when you ride. Carry plenty of extra food, water and fuel.

Check the weather forecast before leaving home. For winter riders, always check the avalanche forecast before venturing into the back country. Avalanche information is available from the Avalanche Forecast Center at 801-364-1581.

Never, ever drink and ride. Alcohol and OHVs don't mix, but create a deadly and illegal combination.
